

the myth itself characterizes pre-film audiences, not how historians regard views about the transformative nature of film. Choice C is incorrect. While the author of Text 2 does indicate that the story of the audience's reaction to *Arrival of the Train* described in Text 1 is a myth that lacks evidence, the text doesn't suggest that the story reflects the fact that film historians believe themselves to be more sophisticated than modern audiences are. Rather, Text 2 suggests that the story persists because of a collective cultural belief, which historians share, in the profound impact of the invention of film. Moreover, the "naïve" versus "sophisticated" distinction mentioned in Text 2 refers to how the myth characterizes audiences before and after the invention of film; it doesn't characterize modern audiences versus film historians. Choice D is incorrect. Although the author of Text 2 would agree that the description of the first showing of *Arrival of the Train* in Text 1 reflects a misconception, the author wouldn't agree that widespread belief in the misconception can be attributed to the fact that it accurately captures early audiences' actual sense of alarm. In fact, the misconception identified by the author of Text 2 concerns the accuracy of the audience's alleged reaction; the author questions whether early audiences were alarmed at all, stating there is "no contemporary evidence" that they reacted in this way. According to Text 2, the description is widely believed not because it accurately captures historical reactions but because it serves as a "founding myth" that supports a belief in film's transformative cultural impact.
