Question

The Herfindahl-Hirschman Index (HHI), a commonly used measure of competition between companies in a particular market, ranges from a score of zero to 10,000 points. Compared with that of a highly concentrated market—that is, a market controlled by very few companies—_____

Which choice completes the text so that it conforms to the conventions of Standard English?

Answer

- A. a market that is less concentrated will have a much lower HHI score.
- B. the HHI score of a less concentrated market will be much lower.
- C. when a market is less concentrated, its HHI score will be much lower.
- D. a less concentrated market will have an HHI score that is much lower.

Correct Answer: B

Rationale

Choice B is the best answer. The convention being tested is subject-modifier placement. This choice makes the noun phrase "the HHI...market" the subject of the sentence and places it immediately after the modifying phrase "compared...market." In doing so, this choice clearly establishes that the HHI score of a less concentrated market—and not another noun in the sentence—is being compared with the HHI score of a highly concentrated market.

Choice A is incorrect because it results in a dangling modifier. The placement of "a market that is less concentrated" immediately after the modifying phrase illogically suggests that a market is being compared with an HHI score. Choice C is incorrect because it results in a confusing, illogical sentence. The placement of the modifier "when a market is less concentrated" after "a highly concentrated market" is contradictory. Furthermore, it's ambiguous what "its" is referring to in "its HHI score," resulting in an illogical comparison. Choice D is incorrect because it results in a dangling modifier. The placement of "a less concentrated market" immediately after the modifying phrase illogically suggests that a market is being compared with an HHI score.
