Question

A species of *Byropsis* algae produces toxins to avoid being eaten by predators. However, in some cases, the toxins the organism uses to protect itself from predation actually _____ its attractiveness to predators. The Hawaiian sea slug, for example, not only tolerates *Byropsis* toxins but actually uses them for protection in the same way the algae does.

Which choice completes the text so that it conforms to the conventions of Standard English?

Answer

- A. is increasing
- B. increase
- C. increases
- D. has increased

Correct Answer: B

Rationale

Choice B is the best answer. The convention being tested is subject-verb agreement. The plural verb "increase" agrees in number with the plural subject "toxins."

Choice A is incorrect because the singular verb "is increasing" doesn't agree in number with the plural subject "toxins." Choice C is incorrect because the singular verb "increases" doesn't agree in number with the plural subject "toxins." Choice D is incorrect because the singular verb "has increased" doesn't agree in number with the plural subject "toxins."
