

persuasive. According to Text 2, the researchers conducted a study that found emotional contagion didn't require physical interaction, because they found evidence of it in text-based online interactions. Choice D is incorrect because neither of the texts claim that emotional contagion primarily occurs when a person is exposed to negativity. Instead, Text 1 claims that physical interaction is required for emotional contagion to occur, and Text 2 describes a study that suggests emotional contagion can occur in text-based online interactions.
