Question

While researching a topic, a student has taken the following notes:

- Two opposing theories of vision divided scholars for many centuries.
- The ancient Greek mathematician Euclid (circa 300 BCE) supported the extramission theory.
- This theory held that the eyes emit a form of radiation that illuminates objects in its range.
- The ancient Greek philosopher Aristotle (384–322 BCE) supported the intromission theory.
- This theory held that objects emit a form of radiation that reaches the eyes.
- In the eleventh century, Arab mathematician Ibn al-Haytham (965–1040 CE) largely settled the debate with the first conclusive experiments supporting intromission.

The student wants to provide a historical overview of the two theories. Which choice most effectively uses relevant information from the notes to accomplish this goal?

Answer

- A. Scholars were divided between the extramission and intromission theories of vision until Ibn al-Haytham’s eleventh-century experiments largely settled the debate in support of intromission.
- B. Through two opposing theories of vision—extramission and intromission—Euclid, Aristotle, and Ibn al-Haytham held that a form of radiation is emitted either from objects or from the eyes.
- C. While Ibn al-Haytham largely settled the debate in the eleventh century, Aristotle supported the theory of intromission centuries before.
- D. Before the eleventh century, the ancient Greek philosopher Aristotle supported the intromission theory, which held that objects emit a form of radiation that reaches the eyes.

Correct Answer: A

Rationale

Choice A is the best answer. The sentence provides a historical overview of the two theories, noting that scholars were divided between them before Ibn al-Haytham’s experiments supporting intromission largely settled the debate in the eleventh century.

Choice B is incorrect. While the sentence identifies the two theories and the scholars that supported them, it doesn’t provide a historical overview of the theories. Choice C is incorrect. While the sentence indicates Aristotle supported intromission theory centuries before Ibn al-Haytham settled the debate, it doesn’t mention extramission theory or provide a historical overview of both theories. Choice D is incorrect. The sentence provides information about intromission theory but doesn’t mention extramission theory or provide a historical overview of both theories.
