Question

Following the Mata Ortiz pottery technique, Mexican sculptor Juan Quezada Celado starts by creating the base of the pot with a slab of clay. _____ he builds the pot walls by layering coils of clay around the perimeter of the base. Celado then smooths out the pot’s walls with a hacksaw blade. At last, the pot is ready to be painted.

Which choice completes the text with the most logical transition?

Answer

- A. For example,
- B. However,
- C. By contrast,
- D. Next,

Correct Answer: D

Rationale

Choice D is the best answer. "Next" logically signals that the information in this sentence—which explains how Celado builds the pot’s walls—is the next step in Celado’s pot creation process. The sentences that follow further signal this information by completing the process.

Choice A is incorrect because "for example" illogically signals that the information about Celado building pot walls in this sentence exemplifies the information in the previous sentence about how Celado’s pot creation process begins. Instead, it is the next step in this process. Choice B is incorrect because "however" illogically signals that the information in this sentence contrasts with the information in the previous sentence about how Celado’s pot creation process begins. Instead, it is the next step in this process. Choice C is incorrect because "by contrast" illogically signals that the information in this sentence contrasts with the information in the previous sentence about how Celado’s pot creation process begins. Instead, it is the next step in this process.
