Question

While light is known as one of the fastest-moving substances, it slows down when passing through some types of matter. One such type of matter is a form of cooled, condensed gas called a Bose-Einstein condensate _____. Dutch physicist Lene Hau famously used a BEC to slow a beam of light to a complete halt.

Which choice completes the text so that it conforms to the conventions of Standard English?

Answer

- A. (BEC),
- B. (BEC) and
- C. (BEC);
- D. (BEC)

Correct Answer: C

Rationale

Choice C is the best answer. The convention being tested is the coordination of main clauses within a sentence. This choice correctly uses a semicolon to join the first main clause ("One...(BEC)") and the second main clause ("Dutch...halt").

Choice A is incorrect because it results in a comma splice. Without a conjunction following it, a comma can't be used in this way to join two main clauses. Choice B is incorrect because it results in a run-on sentence. Without a comma preceding it, a conjunction can't be used in this way to join two main clauses. Choice D is incorrect because it results in a run-on sentence. The two main clauses are fused without punctuation and/or a conjunction.
